Mr. David Katz
Magnetite Canada
dkatz@sustainable-es.com

Dear Mr. Katz:

It was a pleasure to join the Ontario Sustainable Energy Association for the 11th annual Green Energy Doors Open event on October 27.

I would like to congratulate you on receiving the 2021 OSEA CleanTech Award in the Green Buildings category. I commend you for Magnetite Canada's work on its patented acrylic storm window insulator, which can save customers up to 30 per cent on heating and cooling costs.

In my remarks at this year's Green Energy Doors Open event, I noted that Ontario's energy advantage is based in large part on our diverse supply mix. Our grid is 94 per cent emissions-free, thanks to solar, wind, bioenergy, nuclear, and hydroelectric power. Jobs in these sectors and across the supply chain are critical to Ontario's strong economy.

The role of technology in conserving energy and reducing emissions cannot be understated. For instance, I recently announced that Ontario is implementing the Green Button standard provincewide. This is a technology that allows energy customers to review their consumption with an app and receive tips for reducing their energy usage.

I thank you for your ingenuity and innovation in clean technology. Your work is helping Ontario emerge as a clean energy frontier in the global pursuit for renewable energy.

Once again, congratulations and please accept my best wishes.

Sincerely,

A handwritten signature in black ink, appearing to read "Todd Smith". The signature is fluid and cursive, with a long, sweeping underline that extends to the right.

Todd Smith
Minister
